PREFACE

Locating and selecting the right agricultural software for on-farm and institutional use can be difficult and occasionally frustrating. The purpose of the Agricultural Software Directory is to make that task easier. This publication lists all the agricultural software packages we could find that are distributed in North America.

This is the sixth edition of the Agricultural Software Directory since 1985. The number of listings has grown from 500 to over 800 in that time, and the number of manufacturers has grown from 100 to over 130. This edition marks the start of joint publication of information on farm computing by the Ontario Ministry of Agriculture and Food, and Alberta Agriculture.

The information contained in this Directory is also available on the Compu-Farm RBBS in Olds and the OMAF Weather Services Bulletin Board in Guelph. For more information, please contact the Farm Business Management Branch in Olds at (403)556-4240, or the Ontario Ministry of Agriculture & Food at (519)767-3569.

Special thanks to the software manufacturers who responded to our request for new listings and additional information. Their cooperation makes this publication possible and ensures its accuracy.

Please note: A zero under any of the categories in a listing indicates information was not available at the time of printing. When a range of prices is given, this usually relects various combinations of features and enhancements. For packages listed from the United States, prices are given in US dollars because of fluctuations in currency exchange rates. Some of the packages may not be available in your area because of trademark and copyright regulations and/or a company's service policy.

The agricultural software industry is in a constant state of change; consequently, the data contained in this publication is also subject to change. More detailed and current information should be obtained directly from the software manufacturers (refer to listing at the back of this publication).

Your comments, suggestions and corrections are most welcome. Please forward any correspondence to Beth Moritz, Farm Business Management Branch, Box 2000, Olds, AB, T0M 1P0, or phone (403)556-4240 (RITE 154-1240).

HOW TO USE THIS PUBLICATION

This publication is comprised of four tables:

TABLE 1: Software category codes
TABLE 2: Software listing sorted by category, product name, manufacturer
TABLE 3: Manufacturer index and products manufactured
TABLE 4: Canadian province and US state codes

STEP ONE: Refer to Table 1 - Software category codes. Identify the category code for your area of interest. For example, Nutrition/Ration/Fertilizer Analysis software is listed under category code 300. Further, if you are specifically interested in Least Cost Ration Formulation software, you will find it listed under category 307.

STEP TWO: Refer to Table 2 - Software listing, sorted by category, product name and manufacturer. Arranged from left to right, you will see the category code, computer hardware code, product name/manufacturer, a brief description of what the software does, and some technical information including RAM memory, disk drive and printer requirements. Please note that due to the fluctuation in exchange rates, software packages available from the United States are listed in US dollars.

The listing on the bottom of each page in Table 2 lists the computer hardware that corresponds to each code letter.

STEP THREE: Contact the software manufacturers of any products found in Table 2 to obtain information on dealers in your area, program features and example reports. To contact a manufacturer, simply note the manufacturer's name and refer to Table 3, Manufacturer Index. This table lists all the software manufacturers in alphabetical order, and includes a mailing address and telephone number and all software packages available for each manufacturer.

STEP FOUR: Evaluate product features against your needs, and select the package that best meets your needs. For more information on the selection process, refer to the publication "Selecting Farm Software" available from the Farm Business Management Branch.
